

Introduction to new remote: Titan Universal RCU

Every remote from the factory is pre-programmed for ADB set-top boxes. Each remote is also locked to keep subscribers from changing. The remote will need to be reprogrammed to be used with a MOTOROLA/Arris, Entone or Amino.

Below are the steps for doing this:

1. Install Batteries
2. Press STB Button (Will light up when pressed)
3. Press and Hold **Setup** button until STB Button flashes 2 times.
4. Press 9,8,2 and then the STB button will flash 4 times.
Now the remote control is ready for the Quick-Swap feature.
5. Hold **Setup** + **Quick-swap** Button (A,B,C,D) STB button flashes 2 times.
